NORTH TEXAS

What's New This Week...

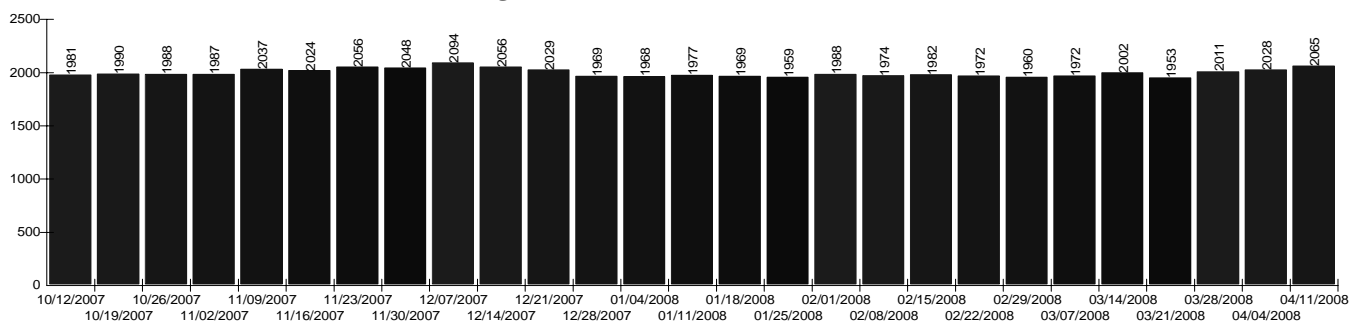

Digital Rig Locator (DRL)...

Did you know that RigData offers datasets with latitude and longitude along with many other fields of valuable information about locations, permits, and offshore activity? We do!

But how do you use this information? Our new DRL product is available in an easy-to-open spreadsheet format that can be imported into mapping software such as Microsoft Streets & Trips. Our datasets – with all the important fields of information – can be imported into software like that and made portable in the field with you on your laptop or high-end GPS unit making it so easy to find rigs. It even gives you the ability to see an overview of activity covering your region. Talk about a way to visualize and analyze where the action is located!

We're demonstrating this at the Texas Alliance of Energy Producers show on April 16th at the Multi-Purpose Event Center (MPEC) in Wichita Falls, TX. Plan to come by our booth (H18) to see our data in action and ask about the special we're offering on the purchase of a DRL dataset. Not able to attend? Call 800-627-9785 for more about RigData datasets with latitude and longitude and to request a sample.

U.S. Land Rig Counts - A Six Month Review
